

AI-powered Group Medical Onboarding and Underwriting

Digitize group medical intake, underwriting workflows, and localized regulatory interfaces on a single AI-driven orchestration layer.

Brochure

Digitize High Volume Group Medical Intake and Underwriting

Eliminate fragmented, spreadsheet-driven group medical onboarding with unified digital journeys that accelerate quotes via a robust pricing engine, reduce regulatory rework, and give brokers and employers real-time visibility across channels.

Business Benefits

01

Quote-to-Coverage in Minutes

Digitally quote, underwrite, and onboard SME group medical policies in minutes instead of days, with integrated regulatory checks on one orchestrated solution.

02

Lower Operational Cost and Regulatory Rework

Reduces manual keying, CHI upload failures, and exception chasing through rules-driven workflows and embedded GovTech integrations.

03

Strengthen Intermediary Retention

Offers one digital window for quotes, endorsements, and status, strengthening broker relationships and key account retention.

04

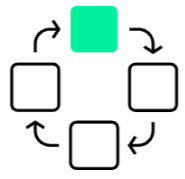

Rapid Multi-Channel Scalability

Supports agents, brokers and aggregators on a shared digital layer without changing existing core systems.

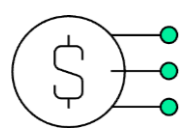

Core Capabilities of the Solution

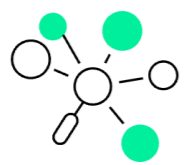

End-to-End Group Lifecycle Workflows

Orchestrates employer onboarding, census upload, underwriting, member onboarding, policy issuance, endorsements, and renewals as a single, auditable digital journey.

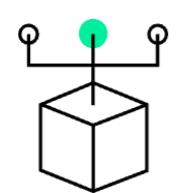

AI-Enabled Intake and Pricing Engine

Uses insurance-specific IDP and decision automation to cleanse, rate, and validate submissions before updating core policy administration systems.

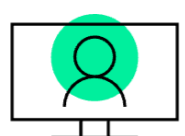

Native CHI, NPHIES and Other Compliance Connectors

Builds CHI, NPHIES, and related regulatory connectors into onboarding flows, with exception queues and re-push mechanisms for failed uploads.

Unified Portals for Intermediaries and Corporates

Provides tailored experiences for agents, brokers, aggregators, and corporate teams, all backed by shared workflows and real-time status tracking.

Human-in-loop Underwriting and Case Management

Routes non-STP cases to workbenches for underwriters and doctors, with full traceability of decisions, loadings, and communications.

Reinvent. Accelerated.

About Neutrinos

Neutrinos transforms fragmented, manual processes into connected, intelligent operations.

Our AI-driven adaptive orchestration platform connects siloed systems and automates insurance operations across new business, underwriting, claims, policy servicing, and distribution. This helps insurers make faster decisions, improve agility, and deliver better experiences.

Trusted by 25+ insurers across 15+ countries, Neutrinos helps organizations reinvent operations with confidence and bring our promise of "Reinvent. Accelerated." to life.
